| University of Texas at San Antonio  
Effect of early (pre-) frailty on cardiovascular performance and CVD risk factors | $30,000.00 | www.utsa.edu |
| University of Texas at San Antonio  
Cellular mechanisms underlying pain relief by dorsal root ganglion stimulation in an animal model of diabetic neuropathy | $27,290.00 | www.utsa.edu |
| University of Texas at San Antonio  
Development of a Monoclonal Antibody Product to Diminish Apoptosis in Diabetic Renal, Ocular and Vascular Complications | $19,500.00 | www.utsa.edu |
| University of Texas at San Antonio  
Enhanced Anti-Cancer Treatments Inspired by Bio-essential Elements: Selenium and Tellurium Nano-Alloys as Potential Therapeutic Agents | $22,000.00 | www.utsa.edu |
| University of Texas at San Antonio  
Self-association of membrane receptors involved in insulin sensitivity | $21,000.00 | www.utsa.edu |
| University of Texas Health Science Center  
WTAP: A novel contributing factor in leukemogenesis | $30,000.00 | www.uthscsa.edu |
| University of Texas Health Science Center  
Positive Deviance in Childhood Obesity | $23,550.00 | www.uthscsa.edu |
| University of Texas Health Science Center  
Inhibition of Nox4-mTOR Axis: A Novel Therapy for Diabetic Cardiomyopathy | $30,000.00 | www.uthscsa.edu |
